## “Green Collar Jobs: Growing Career Opportunities for Job Seekers”

NADAP • CPD presents this outstanding **training opportunity** to our professional colleagues in the community. The movement to make American cities more sustainable, efficient and livable is perhaps the greatest new engine for urban economic growth, innovation and job creation in many decades. Unfortunately, America’s growing green economy faces a looming labor shortage in sectors like manufacturing, construction and installation. Green jobs are not necessarily new jobs, but often traditional jobs in industries and companies that are adapting to new markets and opportunities available in a clean energy economy. Learn more about Green Collar Jobs and resources on how to better assist your clients in obtaining green collar jobs.
